

TM SMART TRACK^{SD}

LUBRICATION TECHNOLOGY

... still got wet feet?

HIGHLY CONCENTRATED LUBRICANT FOR CONVEYOR CHAINS

TM SMART TRACK^{SD} is a highly concentrated chain lubricant for almost any kind of conveyor belts in the beverage industry. Its unique formula and **triple-concentration** ensures considerable reduction of usage of water and lubricant.

Superior lubricity ensures undisturbed transportation of the product while keeping the belts in clean condition.

ADVANTAGES

MULTIFUNCTIONAL	suitable for glass bottles, beverage crates, PET and cans
REDUCED FRICTION	excellent lubricity on plastic and stainless steel chains
COST REDUCTION	considerable reduction of water- and lubricant-usage
GREEN TECHNOLOGY	less impact on sewage; biodegradable and ecotoxicologically safe
SAFETY	less foam
MATERIAL FRIENDLY	less corrosion

APPLICATION

TM SMART TRACK^{SD} is applied through nozzles and controlled via the duty cycle signal of a regular central wet lubrication system.

Dosing : in proportion to water-quantity
 concentration: 0,05 to 0,1% (depending on system and product)
 temperature: room temperature
 time: adjustment of the ideal duty cycle is done by your THONHAUSER expert

Before first use of TM SMART TRACK^{SD} in a central lubrication unit, all parts of the conveying system have to be cleaned thoroughly and residue-free using **TM FOAM CITRO**.

TM SMART TRACK^{SD}

aggregation state	clear, yellow fluid
density (at 20°C)	0,981 +/- 0,007
pH	4,3 +/- 0,3 (100% solution)
components	surfactants, cationic surfactants, organic acids

LABELLING ACCORDING TO THE AUSTRIAN CHEMICAL REGULATIONS:

No hazardous preparation.
 For further information please consult the material data safety sheet.
